

Straightening System's Keratin Complex Hair Therapy

Achieve straight, smooth and sexy hair with our Keratin Complex hair therapy

- Gentle on the hair, with no hair damage
 - No unpleasant fumes or odors
 - Leaves hair softer, silkier and shinier
 - Less maintenance than traditional hair straightening systems
 - Reduces daily straightening time
- Hair is basically Keratin-when re-infused into the hair shaft, you are providing "skin care for your hair." The more you treat the hair, the healthier it becomes.
- Tames frizz, relaxes curl

Tools

One of the most common questions is: "Wont hair dryers and irons actually damage my hair?" Dryers: With a better heating coil and constant even flow of air, the dryers give off an even flow of heat, which eliminates the hot spots that can damage hair.

Flat irons: Heater in ceramic plates distribute heat evenly throughout the plates, with no hot spots that can damage and even burn hair.

We would like to introduce you to the all new "green" salon that will pave the way for salons in the future.

Main features and Benefits of Organic Color Systems

Certified organic ingredients containing NO toxic chemicals, such as AMONIA.

Ammonia is used in most hair coloring systems today. The only purpose of Ammonia is to open the hair cuticle in an aggressive manner. It also damages the Tyrosine, an amino acid/protein found inside the hair shaft.

Other benefits of using an organic color system

- No more itchy, stinging or staining of the scalp
- No more having to deal with bad color smell, watery eyes or irritated nose
- Coloring system contains no plastic
- No animal testing or animal products
- No parabens
- Change your color frequently without the worries of hair damage

Organic color ingredients:

The organic color system is a unique blend of certified organic natural extracts containing Vitamins C and E. These natural extracts are combined with plant derived conditioners that will actually enhance, protect and moisturize the hair as its going through the color process.
